Residential Swimming Pools:

1 – Swimming pools are to comply with the International Residential Code New Jersey Addition or [IRC2015-R326], the NEC [NFPA 70] 2014 & the National Standard Plumbing Code 2015.

2 – The following must be submitted with the construction application:

- a. One site plan and zoning application indicating the location, size, and shape of the pool as well as location of other structures.
- b. Description and location of barriers (fences), gates & filtration systems. Please note that barriers cannot consist of fences on neighboring properties.
- c. Applications of in-ground pools must include two copies of structural plans signed and sealed by a licensed New Jersey architect or engineer.
- d. All pool barriers must comply with the *International Swimming Pool and Spa Code* [See attached code and illustration].
- e. Manufacturer specifications for all diving boards, slides and ladders must be submitted with the application.
- f. A temporary safety barrier must be in place during construction of all pools.
- g. Electrical layouts and gas riser diagrams [as applicable] are also required.
